As an experienced Full-Stack Developer and DevOps Engineer, I leverage my expertise in providing innovative, scalable, and high-quality applications. I thrive in dynamic, fast-paced environments, focusing on delivering impactful solutions. I seek a challenging role that emphasizes continuous learning and contribution to others.

Skills & Abilities

- **Frontend Development:** Delivering pixel-perfect, responsive designs with **React** and **Redux**. Have some experience with **React Native**.
- **Backend Development:** Expertise in building RESTful **APIs** using **Node.js** and **Express.js**, while maintaining performance and security.
- **DevOps & Cloud:** Comprehensive experience configuring and managing **GCP** and **AWS** environments, **CI/CD** pipelines, and handling security, credential management, and cloud cost optimization. Proficient in **Docker**-based deployment with knowledge of Docker Swarm. Experience with **Jenkins**, **Linux** system administration, VM management, cloud load balancing, proxy servers, DNS, and other DevOps tools.
- **Database Management:** Skilled in designing and managing performant and scalable databases, including **MongoDB**, and **MySQL** databases. Ability to maintain database replica, security, backups, and migrations.
- **Other Tools:** Familiarity with JIRA, ClickUp, Slack, Google Workspace, Adobe XD, Illustrator, Photoshop, Canva, SketchUp, draw.io, DBdiagram, MS Excel, and other tools for effective collaboration.

Work Experience

Credencesoft - Mumbai, India
Full Stack Software Developer and DevOps - Fulltime and Parttime, Remote
Jan 2022 - Present

- Set up and managed entire cloud infrastructure and deployment processes for all CredenceSoft product deployments.
- Successfully migrated the infrastructures of all BookOne products to new configurations.
- Collaborated directly with clients to provide software and technology solutions.
- Developed a data-driven application for EnergyAnalytics.
- Delivered web scraping solutions for MyWellabee.
- Assisted the team with technical challenges for Rentifai.
- Mentored and guided interns and junior developers in software development tasks.

Aspyrer - Toronto, Canada
Full Stack Software Developer - Full-time, Remote
August 2020 - September 2021 (1 year)

- Contributed to the development of responsive, high-performance web and mobile applications using React and React Native.
- Built and maintained the backend for applications using Node.js, Express, and Google Cloud Firestore.
